TINDOL

CONSTRUCTION

In March 2004, Patriot Dozer Service was formed as a family operation by Jason Tindol while working with his father Dale. Starting as a single dozer operation to service local ranchers in South Texas the Tindol family quickly became well known for getting the job done right. Jason's brother Garrett joined the company after Dale passed away in 2007. The company was renamed as Tindol

Construction to better suit the growing service lines. In 2010, the company began serving oil and gas clients in Eagle Ford Shale and throughout the great state of Texas. Today, we provide high quality aggregate materials to various clients and projects in South Texas and along the Gulf Coast. Tindol Construction also works across the United States providing civil site services to clients in the oil and gas, industrial and renewable energy market sectors.

FULL-SERVICE, NATIONWIDE CIVIL CONTRACTING

Tindol Construction is a reputable full-service civil contractor for the nation's energy-infrastructure projects. Operating across the U.S., we deliver expertise and personalized service you can trust. We will do all that is possible to ensure that your project is completed safely, on time and on budget.

RENEWABLES

PIPELINES

AGGREGATES

FACILITIES

CIVIL

Tindol Construction has proven experience from conventional energy sources such as oil and gas, to wind and solar in the renewable energy market sector. **PIPELINES:** We are experts at pipeline construction and maintenance projects with a focus on safety and schedule. **FACILITIES:** Since 2010, Tindol Construction has executed facility projects in Upstream, Midstream and Downstream Industries, delivering successful projects for our customers. **RENEWABLES:** Clean and renewable energy is not just saving down on cost, it reduces the carbon footprint and protects the planet for our children. **AGGREGATES:** We take pride in delivering quality material at competitive prices. **CIVIL:** We have a reputation for being extremely responsive and the preferred choice for challenging projects. Additionally, you will find that our team's experience will help you provide your clients cost-effective solutions proactively.

OIL AND GAS
