TINDOL

CONSTRUCTION

In March 2004, Patriot Dozer Service was formed as a family operation by Jason Tindol while working with his father Dale. Starting as a single dozer operation to service local ranchers in South Texas the Tindol family quickly became well known for getting the job done right. Jason's brother Garrett joined the company after Dale passed away in 2007. The company was renamed as Tindol

Construction to better suit the growing service lines. In 2010, the company began serving oil and gas clients in Eagle Ford Shale and throughout the great state of Texas. Today, the company works across the United States serving clients in the oil and gas, industrial, and renewable energy market sectors as a diverse energy services provider dedicated to setting high marks in safety and quality and becoming known as a civil site contractor that performs as an extension of its clients business.

FULL-SERVICE, NATIONWIDE CIVIL CONTRACTING

Tindol Construction is a reputable full-service civil contractor for the nation's energy-infrastructure projects. Operating across the U.S., we deliver expertise and personalized service you can trust. We will do all that is possible to ensure that your project is completed safely, on time and on budget.

RENEWABLES

PIPELINES

CIVIL

FACILITIES

Tindol Construction has proven experience from conventional energy sources such as oil and gas, to wind and solar in the renewable energy market sector. **RENEWABLES:** Clean and renewable energy is not just saving down on cost, it reduces the carbon footprint and protects the planet for our children.

AGGREGATES: We take pride in delivering quality material at competitive prices. **PIPELINES:** We are experts at pipeline construction and maintenance projects with a focus on safety and schedule. **CIVIL:** We have a reputation for being extremely responsive and the preferred choice for challenging projects. Additionally, you will find that our team's experience will help you provide your clients cost-effective solutions proactively.

FACILITIES: Since 2010, Tindol Construction has executed facility projects in Upstream, Midstream and Downstream Industries, delivering successful projects for our customers.

AN ENERGY SERVICE COMPANY

Tindol Construction is dedicated to providing experienced and professional services to wind, solar and energy storage projects throughout the United States. Applying environmentally sensitive construction practices in remote and rugged environments while minimizing cost to our clients.

We've partnered with some of the largest energy developers and EPC's in the U.S. Our work translates into being the go-to trusted civil site contractor partner for site preparation and civil infrastructure services. Additionally, our aggregate business provides our clients high quality sand, gravel, and crushed stone product at a cost competitive price they can count on.

PROVEN EXPERIENCE

- 1,000+ miles of roadway
- 700+ wind turbine sites
- 3,000,000+ CY of excavation
- 3,000,000+ CY of aggregates
- 250+ miles collection lines – trenching & reclamation
- 2,000,000+ CY of rock excavation utilizing drill, blast, and custom crush operations
- 10,000 lineal feet of CMP drainage pipe
- 100+ miles fencing
- Extensive low water crossing and drainage experience

CIVIL SITE SERVICES

Our services include clearing and mass grading, excavation and placement of base material, and all civil site construction work related to roads, wind turbine pad sites, solar sites, laydown yard and electrical substation locations. Tindol Construction works extremely well in rock! For select projects and clients we will also construct foundations for wind turbines and perform pile driving for solar panel installations.

- Civil site construction for roads, wind turbine pad sites, solar and substation sites
- Foundation excavation, construction and backfill
- Rock mesa and foundation hammering, drilling, blasting and rock crushing
- Collection line and transmission line right-of-way work
- SWPPP, required reclamation work including seeding and erosion control
- Fencing
- Soil stabilization
- Pile driving

RECENT RENEWABLES PROJECTS INCLUDE

- Azure Sky Solar Farm (256 MW) – Enel Green Power – Primoris
- Black Jack Creek (240 MW) – RWE – Fagen
- High Lonesome Wind Farm (500 MW) – Enel Green Power – RES
- Hidalgo II Wind Farm (50 MW) – EDP Renewables – RES
- Ranchero Wind Farm (300 MW) – Scout Clean Energy – RES
- Diamond Vista Wind Farm (300 MW) – Enel Green Power – RES
- Heart of Texas Wind Farm (180 MW) – Scout Clean Energy – RES
- Gulf Winds Repower Project (271 MW) – Pattern Energy – RES
- Cranell Wind Farm (220 MW) – E.ON – IEA
- Karankawa Wind Farm (307 MW) – (aggregate supplier) – Avangrid
- Fort Bend Solar (240 MW) – Acciona – Wanzek
- Various Michigan Solar Projects (55 MW) – AES – Borrego Solar
